

WOMEN IN BUSINESS PORTFOLIO

By SD Nicole Brown

Get yourself an awesome little portfolio (suggest leather zip-around). You will need the plastic sheet protectors you can fit in the binder with the 3 holes on the side. Inside you will place the completed portfolio with their business card and AFTER picture. The other side can be for a full size advertisement (free to them!) and then slip more business cards in between the papers. You can build your business with quality women saying this, “My name is _____ and I am with Mary Kay. I am starting a Women in Business Portfolio and I would LOVE to feature you and your business! Could you get excited about some free advertising? All we need to do is a quick 45-minute makeover and picture. You will fill out the portfolio sheet and place your business card on it!”
