****Per Lori Hogg:**
"Muted" means that it has less pigment and is less colorful.
 Ex: if every foundation on a client turns really orange or really pink or yellow, then try a Muted shade. Ivory & Beige Muted shades at #4 and #6. Use #4 and #6 only as a last resort, when you cannot find the correct shade in her undertone.

There may be several choices, as every option is included. Thanks to:
 *Mary Kay
